## DETAILED ACTION

1. This non-final office action is responsive to the amendment entered on 10/26/2004. Claims 1-38 are pending in this office action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-38 are rejected under 35 U.S.C. 102(b) as being unpatentable over Dangelo et al. Pat. No. 5555201.

**Regarding claim 1:** Dangelo teaches the method comprising:

receiving a design specification for electrical behavior or transistor level characteristics of said design specific cell (col. 2, lines 35-47, col. 4, lines 25-67);

mapping to a transistor -level representation of said design-specific cell, said mapping based on said design specification (col. 29, lines 15-20, col. 33, lines 33-47);  
and

evaluating said transistor -level representation of said design-specific cell for meeting said design specification (col. 50, lines 15-19).

**Regarding claim 2:** Dangelo teaches a method with design context (col. 2, lines 25-35).

**Regarding claim 3:** Dangelo teaches a method with receiving a description (col. 1, lines 58-67).

**Regarding claim 4:** Dangelo teaches a method with a netlist (col. 21, lines 10-15) and a standard-cell representation (figure 1 ).

The remaining claims of 102( b) section contain features similar to the rejection of claims 1-3 and/or 4 and rejected in rationale.
